holds up to
93KG

20MM DRILL BIT
AV EQUIPMENT, CABINETS
AND BATHROOM SUITES

RED
holds up to
74KG

18MM DRILL BIT
SHELVES, MIRRORS
AND SHOWER UNITS

BLUE
holds up to
113KG

25MM DRILL BIT
WALL MOUNTED TVS, RADIATORS,
KITCHEN CABINETS

† Drill bits sold separately

Gripit Plasterboard Fixings are designed for use with all types of plasterboard installation. The unique Gripit wings fold out in small cavity spaces to create a vice-like grip and distribute weight more effectively than conventional plugs or fixings.

BENEFITS

- Suitable for all plasterboard types (9.5mm to 15mm)
- No need for battening, noggings or stud anchors
- Works on Dot & Dab, double thickness and insulated plasterboard (Gripit Undercutting Tool required)
- Removable and reusable

QUICK AND EASY TO INSTALL

DRILL IT

Use a flat drill bit to drill a hole in the plasterboard.

The unique Gripit collar adjusts to the thickness of the plasterboard.

TAP IT

Use a hammer to gently tap the fixing into the drilled hole.

Top tip - ensure arrow on fixing collar is pointing upwards to correctly align fixing in wall.

TURN IT

Use a screwdriver to turn the centre cam and open the wings for super gripping strength.

Top tip - to reuse Gripit, simply reverse the action to close the wings and remove from the wall.

GRIPIT

**YOU'RE READY TO FIX
HEAVY STUFF TO THE WALL**

SHEAR - LOAD INFO

The weight acting downwards on an object hung from a Gripit fixing, which has been installed into a vertical plasterboard wall. *e.g. the object does not project outwards and sits flat against the wall, incl. mirrors, pictures, radiators, fixed TV's and brackets.*

	YELLOW	RED	BROWN	BLUE
Safe static load*	71kg	74kg	93kg	113kg

TENSION - LOAD INFO

The weight applied to the Gripit fixing if 'pulled' away from the wall. *e.g. a light fitting hanging from a ceiling.*

	YELLOW	RED	BROWN	BLUE
Safe static load*	20kg	20kg	20kg	20kg

CANTILEVER - LOAD INFO

The weight acting downwards when applied to a horizontal beam and at a known distance from a vertical wall. *e.g. a vase or a number of books sat on a shelf at a specific distance from the wall.*

	YELLOW	RED	BROWN	BLUE
50mm from wall*	30kg	32kg	36kg	40kg
75mm from wall*	27kg	28kg	29kg	31kg
150mm from wall*	16kg	18kg	24kg	25kg

*Independently tested on 15mm plasterboard.

NB: Safe loads will reduce if plasterboard is thinner (min. 9.5mm).

Do not install on damp, weak, or damaged plasterboard. Continuous and repetitive loading/ unloading on fixing will weaken plasterboard. Always refer to manufacturer's instructions before fixing any object to plasterboard with Gripit and use the maximum recommended number of fixings.

TECHNICAL INFORMATION

	YELLOW	RED	BROWN	BLUE
Gripit diameter	15mm	18mm	20mm	25mm
Gripit depth	11.5mm	11.5mm	11.5mm	11.5mm
Screw diameter	4.0mm	5.0mm	M6	M8
Screw length	25mm	30mm	30mm	30mm
Min. spacing between Gripits (centres)	25mm	30mm	50mm	100mm

GRIPIT TOOLKIT ESSENTIALS

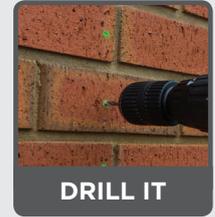

GRIPIT

MARXMAN™ PROFESSIONAL MARKING TOOL

The perfect drilling companion for electrical, plumbing, building and DIY marking jobs.

BENEFITS

- Marks a fixing point through fitting holes of various diameters and depths (up to 45mm)
- **NB:** Deep Hole pen available (between 45mm & 100mm)
- Marks all surfaces including brick, metal, wood, pebbledash, porcelain & ceramic
- Delivers 250+ bursts of removable (non-toxic) green pigment
- Use at any angle or height

GRIPIT SELF-DRIVE THE ONLY SELF-DRIVE THAT WON'T OVERTIGHTEN

BENEFITS

- Inner cam rotates when it reaches maximum torque preventing overtightening
- Can be used on all plasterboard types
- Perfect to hang picture frames, light switches, clocks and more
- Install with drill or screwdriver

PERFORMANCE INFORMATION

	Fixing length	Min thickness to supporting layer	Screw size
Dimensions	28mm	35mm	3.5 x 30mm
	Shear	Cantilever @ 100mm	Tension
Loads*	20kg	16kg	8kg

* Independently tested on 15mm plasterboard

GRIPIT ROLL PLUG THE WALL PLUG THAT FITS EVERY SCREW SIZE

- Quick and easy to use
- Fits all screw sizes
- For brick, block & plasterboard
